RE: Safety-Kleen Farmington - Draft Permit Comments  
NM 980698849

Dear Ms. Sisneros:

On January 8, 1991, the Environmental Protection Agency, Region 6, received a draft permit for Safety-Kleen Farmington, prepared by the New Mexico Environmental Improvement Division. This document establishes provisions for the storage of hazardous wastes.

We have completed a review of the draft permit and offer the enclosed comments for your consideration. The comments address the criteria for issuing a Resource Conservation and Recovery Act (RCRA) and Hazardous and Solid Waste Amendment (HSWA) permit to the facility, and include administrative and technical comments, as well as specific permit provisions.

If you have any questions please contact Richard Mayer of my staff at (214) 655-6775.

Sincerely yours,

William K. Honker, Chief  
RCRA Permits Branch
