

PUBLIC NOTICE

December 14, 2021

NMD980698849

Safety-Kleen Systems, Inc. submitted a Class 1 modification (with prior NMED approval) to the New Mexico Environment Department notifying the Department of changes to the RCRA Part B Permit for its Farmington, NM branch. This was approved by the New Mexico Environment Department on 11-15-21. This public notice is submitted as required by NMAC 20.4.1.900 which incorporates by reference 40 CFR 270.42 (a)(ii).

- In the submittal the Safety-Kleen requested that changes be made to the current Operating Permit Attachment G, Closure Plan. These changes would allow the Facility to reuse the permitted waste tanks, once cleaned to store non-hazardous used-oil-related wastes in those tanks and at the drum storage areas for 10-Day transfer following implementation, completion, and certification of the closure, after NMED has approved the closure. In addition, NMED changed the Closure Plan modification request to retain the requirement for wipe sample collection in the aisles and loading areas associated with the drum storage unit.

If you have any questions about this notification, please contact Nick Culian at 530-363-2632,
