**ORIGINATING PARTY**
- John Andrews
- Sandia

**OTHER PARTIES**
- Other Parties

**SUBJECT**
February 13, 1991, RFI Workplan: Transmittal letter stating there was a "positive finding for RCRA regulated waste at the MWL.

**DISCUSSION**
Andersen said the the statement in the attached letter means that RCRA regulated constituents have been identified in the MWL. This could be part of the hazardous component of mixed waste disposed there or could be from waste disposed there. First through 1970's, Sandia had no record of RCRA regulated waste being disposed in the MWL.

**CONCLUSIONS OR AGREEMENTS**
Sandia will be happy to provide further info that shows the MWL is not RCRA regulated. Conclusion is that the attached letter does not accurately define "RCRA regulated waste" as it applies to the MWL.

**DISTRIBUTION**
- John Andrews
- S. Miller
- Sandia File
