SUBJECT: Notice of Deficiency: August 1995 Proposals for No
Further Action (3rd round)

I have discussed the question of sampling for pesticides and herbicides at ER Site 27, OU 1332, as required in NOD Comments Nos. 16 and 17, with my program manager and with Will Moats of the NMED DOE OB. The decision is that pesticide/herbicide testing will be required at this site. The reason for this is the lack of information provided about the animal experiments.
