Re: Mixed Waste Landfill

Dear Secretary Curry:

On behalf of the Mountain View Neighborhood Association, we would like to take this opportunity to voice our view of the Mixed Waste Landfill and the recent public hearing on the possible clean up of this site.

The Ground Water Protection Advisory Board submitted a resolution dated November 8, 2004 and listed three findings along with six recommendations regarding the Mixed Waste Landfill. A copy of their resolution with their findings and recommendations is attached.

We strongly urge you to consider and follow the Advisory Board's findings and recommendations. The Ground Water Protection Policy and Action Plan was adopted by the County Commission in November 1993 and by the City Council in August 1994 is there to protect the county the county's ground water resource, find and clean up contaminated ground water and to promote the coordinated protection and prudent use of the ground water resources through the region. The State of New Mexico Environment Department needs to join this effort to protect our very precious ground water.

Sincerely,

Patty Grice

Patty Grice,
President, Mountain View Neighborhood Association
