Secretary Ron Curry
New Mexico State Environmental Dept.
Hazardous Waste Bureau
2905 rodeo Park Drive, Bldg E.
Santa Fe, New Mexico

Dear Secretary Curry:

I spoke at the Sandia Mixed-Waste landfill permit hearing at the Radisson in Albuquerque last spring. I understood that our state environment department was going to respond to taxpayers' and homeowners' concerns that Sandia Corporation was burying really toxic waste and was going to skate on responsible disposal. This, here, in our state's biggest city! I never did hear back from you folks.

Radioactive waste is forever. It has killed thousands of miners, workers and civilians and will FOREVER continue to poison and kill and contaminate our water and land. There will have to be some serious mitigation done here. I hope you can understand people's anxiety.

Don't let Sandia Corporation get by with it!! You are the ONLY people that can make the company comply with environmental laws and leave New Mexicans SOME part of this beautiful state livable for your and our grandkids and their grandkids. Please tell me how you are doing this and how taxpayers can help make Sandia responsible.

Thanx.
