Sandia National Laboratories' Environmental Restoration Project...

Sandia National Laboratories
Environmental Restoration Project

...Invites you, the public, to join us for a review of our restoration work on 5 environmental sites, located on Kirtland Air Force Base. These sites are now deemed appropriate for a new status as "completed" on our environmental permit with the State of New Mexico. Before they earn that designation, however, a community review is in order.

Sandia will provide information on each of these sites in a poster format for the review by any interested citizens. Sandia environmental professionals will be on hand to answer questions about this work, as will officials from the New Mexico Environment Department and the Department of Energy.

Come and take a look at all 5 sites -- or those of your choice. Have some coffee or tea and question our site investigators, who are looking forward to discussing the work they have accomplished. Interested citizens are encouraged to provide written comments about the sites, which will become a part of the official record.

NOTICE
Sandia National Laboratories
Environmental Restoration Project

**Notification of a Request for a Class 3 Permit Modification
To the Hazardous and Solid Waste Amendments Module
Of the Resource Conservation and Recovery Act Permit**

No Further Action Approved Determinations

The Department of Energy (DOE) hereby notifies you that it is initiating a Class 3 Modification for the designation of four (4) solid waste management units (SWMUs) and one (1) area of concern (AOC) as "approved for No Further Action" in Table A.2 of the Hazardous and Solid Waste Amendments (HSWA) Module (Module IV) of the Resource Conservation and Recovery Act (RCRA) Permit for Sandia National Laboratories/New Mexico (SNL/NM) (EPA ID No. NM5890110518-1).

For each SWMU or AOC, the rationale for no further action designation has been documented in either a No Further Action (NFA) proposal (for SWMUs and AOCs) or a Proposal for Corrective Action Complete (CAC) (for SWMUs). The New Mexico Environment Department (NMED) has reviewed the NFA proposals and proposals for CAC, and the NMED has issued a Certificate for CAC for each SWMU/AOC. NMED issued Certificates for CAC with controls for three of the SWMUs.

On April 29, 2004, the Compliance Order on Consent (Consent Order) for Sandia National Laboratories became effective. Under Section III.V of the Consent Order, work that has been satisfactorily completed prior to the effective date of the Order, that fulfills the substantive requirements of the Order, and that has been approved by the NMED in writing, is deemed to comply with the Consent Order. In this case, the work completed at the five (5) SWMUs/AOCs satisfies these requirements, as evidenced by the Certificates for CAC issued by the NMED. A determination of CAC under the Consent Order is equivalent to a No Further Action Approval under the RCRA Permit.

DOE requests that the five (5) SWMU/AOCs, identified in the table below, be designated as no further action approved (Corrective Action Complete) in Table A-2 of the HSWA Module. When the new RCRA permit is issued for SNL/NM, two new tables (Corrective Action Complete with Controls and Corrective Action Complete without Controls) will be added to the corrective action provisions. SWMU 28-2 and AOC 1101 will be included on the table for SWMUs that are Corrective Action Complete without Controls, and SWMUs 8, 58 and 105 will be included on the table for SWMUs that are Corrective Action Complete with Controls.

This permit modification is needed to designate the five (5) SWMUs/AOCs as no further action approved (Corrective Action Complete) in Table A-2 of the HSWA Module.

**Identification of SWMUs Proposed for Designation as
Corrective Action Complete (No Further Action Approved)**

| SWMU/AOC | NFA/CAC Date Submitted/Batch No. |
|---|---|
| ER Site 8 Open Dump (Coyote Canyon Blast Area) | April 2005/-- |
| ER Site 28-2 Mine Shaft | September 1995/3 |
| ER Site 58 Coyote Canyon Blast Area | April 2005/-- |
| ER Site 105 Mercury Spill (Building 6536) | September 1994/1 and July 2006*/-- |
| AOC 1101 Building 885 Septic System (TA-I) | December 2003/ DSS Round 3 |

*This site was reinvestigated after a new release was discovered.

AOC = Area of Concern.

DSS = Drain and Septic System.

ER = Environmental Restoration.

NFA = No Further Action.

SWMU = Solid Waste Management Unit.

TA = Technical Area.

-- = No batch number assigned, single CAC document submitted.

Comment Period. A 60-day public comment period has been initiated with the publication of this notice. Comments on this request for permit modification will be accepted through March 14, 2008. Comments should be directed to:

Mr. John Gould
U.S. Department of Energy
Sandia Site Office
P.O. Box 5400
Albuquerque, New Mexico 87115

Public Meeting. Each SWMU/AOC proposed for No Further Action will be presented in a poster format, and SNL/NM staff will be available to answer questions. The meeting will be conducted as

an open house, with posters available for individual review at any time throughout the three hour time period. The meeting will be held on January 29, 2008, from 3:30 to 6:30 pm at the Manzano Mesa Multigenerational Center, 501 Elizabeth NE, Albuquerque, NM 87123.

Department of Energy Contact. Questions may be directed to John Gould, (505) 845-6089.

Sandia National Laboratories Contact. Questions may be directed to Paul Freshour, (505) 845-3108.

New Mexico Environment Department Contact. Questions may be directed to John Kieling, (505) 428-2535.

Public Inspection of Documents. A copy of the request for permit modification and supporting documentation is available for public inspection at the Government Information Department, Zimmerman Library, University of New Mexico, Albuquerque, NM 87131-1466.

Compliance History. The permittee's compliance history during the life of the permit being modified is available from the NMED contact person.
