Subject: Sandia Labs MWL

Dear Sir,

I'm writing to encourage you to implement stronger measures to regulate the Mixed Waste Landfill site at Sandia National Labs. The current measures are woefully inadequate and therefore I urge you to do the following:

- \*conduct public hearings on the current regulations governing the site.
- \*impose stricter regulations to regulate this site due to the fact the current dirt covering is far too weak to contain this hazardous waste. When this waste migrates to the groundwater or neighborhoods or enters the air our community will experience a major crisis and it will degrade the quality of life.

Please act on this issue immediately.

Sincerely,  
Kent Zook
