**Subject:** RE: Request to install access gate at south end of Mixed Waste Landfill

Hi John,

NMED has no concerns regarding the installation of another gate at the MWL that matches the specifications for the existing gate. Please feel free to install the new gate, and thanks for consulting with us on this matter.

- Will

**Subject:** Request to install access gate at south end of Mixed Waste Landfill

Hi Will

As we discussed on the phone on April 21, 2011, we are requesting e-mail approval to install an access gate at the south end of the MWL perimeter fence.

Per that discussion, we are conducting a number of activities to maintain the MWL ET Cover. These activities include supplemental watering, tumbleweed removal, and supplemental seeding activities (i.e., seeding, gravel mulching, and top soil augmentation); as approved by NMED on April 1, 2011.

Due to the location of the perimeter fence, it is not possible to transport materials or remove stockpiled weeds at the south end of the site without driving over the cover surface. This is because the perimeter fence is immediately adjacent to the cover side slopes along the east and west boundary and the only access gate is at the north end. To minimize vehicle traffic on the cover, we are requesting e-mail permission to install an access gate at the south end of the MWL perimeter fence. The gate will be constructed to the same specifications approved by the NMED for the northern gate, as detailed in the CMIP and CMI Report. A revised as-built site plan depicting this minor change to the existing perimeter security fence will be submitted to NMED in the revised LTMMP.

Thanks for your help  
John
