One Sandia gentleman ~~was~~ said, "That was before my time." In a generation, the officials will say to our descendants about what you are doing, "Oh that was before my time. I have no responsibility."

The credibility of Sandia and Kirtland Air force base is very low because of the great quantity of jet fuel sitting in & on our aquifer today and the failure to deal with it. They could improve their credibility if they would do more rather than less to deal w/ the radioactive waste issue. We request a public hearing!
