Hazardous Waste Bureau  
2905 Rodeo Park Dr. East, Bldg. 1  
Santa Fe, NM 87505

Subject: Supplemental Comments on Draft Hazardous Waste Permit for Sandia National Laboratories/New Mexico, Environmental Protection Agency Identification Number NM5890110518 and Proposed Granting of Corrective Action Complete Status for 24 Solid Waste Management Units/Areas of Concern at Sandia National Laboratories/New Mexico

Dear Mr. Kieling:

On behalf of the Department of Energy (DOE) and Sandia Corporation (Sandia), the DOE is submitting the enclosed supplemental comments on the Subject draft Permit.

On November 8, 2012, the DOE and Sandia submitted comments, stated opposition to issuance of the Permit as drafted, and requested a public hearing to address the outstanding issues. The supplemental comments submitted at this time address several additional issues in the draft Permit but do not resolve the outstanding issues that led to DOE/Sandia opposition of the draft Permit. Thus, the DOE and Sandia continue to oppose the issuance of the Permit as drafted. None of the supplemental comments address the proposed granting of corrective action complete status for the 24 Solid Waste Management Units/Areas of Concern. Each comment includes alternate language to address the specific issue.

In addition to the supplemental comments, the DOE and Sandia are providing a map as requested by the New Mexico Environment Department. The enclosed map shows the location of each SWMU and AOC listed in Attachment K of the draft Permit.

If you have questions, please contact me at (505) 845-6036 or David Rast of my staff at (505) 845-5349.

Sincerely,

Geoffrey L. Beausoleil  
Manager

<td>Part 2, Section 2.2.3</td>
<td>19</td>
<td>The Permittees may accept, store, treat or otherwise manage at the permitted units at the Facility, only the following hazardous or mixed wastes from off-site sources.</td>
<td>1. Treatment-derived waste or residues from wastes generated at the Facility, sent off site for treatment at off-site facilities, and subsequently returned to the Facility prior to final disposition off-site may be managed at the Facility only subject to the following conditions:</td>
<td>Please revise the requirement in b. as shown to be consistent with the initial statement, which allows storage, treatment, or other management at Permitted Units at SNL within the 90-day period. For example, hazardous or mixed wastes may undergo treatment during the 90-day period prior to shipping the wastes off-site for further management.</td>
</tr>
<tr>
<td></td>
<td></td>
<td></td>
<td>a. for wastes with no available site for final disposal, the Permittees shall provide written notice in accordance with Permit Section 1.14.1, either through mailing of a hard copy letter or via electronic mail that will be followed by submittal of a hard copy letter, to the Department that there is no available site for final disposal within five days of receipt of the treatment-derived waste or waste residues at the Facility; or</td>

<td>2</td>
<td>Part 5, Section 5.9</td>
<td>53</td>
<td>Soil samples shall be collected at a depth of 0-2 inches at the locations listed in Table 5-2 of this Permit Part. Approved analytical methods, preservation methods, holding times, and container requirements are listed in Table 5-3 of this Permit Part. Sample locations must be surveyed pursuant to Permit Section 8.10.2.5.</td>
<td>Soil samples shall be collected at a depth of 0-2-0.6 inches at the locations listed in Table 5-2 of this Permit Part. Approved analytical methods, preservation methods, holding times, and container requirements are listed in Table 5-3 of this Permit Part. Sample locations must be surveyed pursuant to Permit Section 8.10.2.5.</td>
<td>Please revise the sample depth to reflect standard practice for collection of surface samples for corrective action, such surface samples are typically collected from depths of 0-6 inches. The additional depth is required to allow sampling personnel to accommodate rocks, debris, and other surface irregularities, and to collect sufficient soil in cases of elevated moisture content.</td>
</tr>
<tr>
<td>3</td>
<td>Part 5, Table 5-3</td>
<td>56</td>
<td><strong>Table footnote:</strong> Unless otherwise noted, methods are EPA SW-846 Methods. Use currently approved method revision.</td>
<td><strong>Table footnote:</strong> Unless otherwise noted, methods are taken from EPA SW-846 Test Methods for Evaluating Solid Waste, Physical/Chemical Methods, 1986 and all approved updates. Use the most currently approved method for analysis. Method numbers shown in this table are subject to change through future updates and may differ from those shown here. Equivalent methods may be substituted only if the equivalent method includes the same analyte list, method detection limits equal to or lower than the original method, and equivalent or higher data quality. If an equivalent method is used, the Permittees shall provide justification in the report to the Department.</td>
<td>Please revise the footnote to provide consistency with the analytical requirements in Permit Attachment C (specifically Table C-4) regarding use of updated methods and changes in method numbers. Use of equivalent methods is consistent with Permit Attachment C and also with the requirements of the Post-Closure Care Permit for the SNL Chemical Waste Landfill.</td>
