

New Mexico Environment Department:

Concerning Case #hwb 15-18 (p), I am opposed to issuing the status of Corrective Action Complete to the Mixed Waste Landfill (MWL) at Sandia National Labs (SNL) for these reasons:

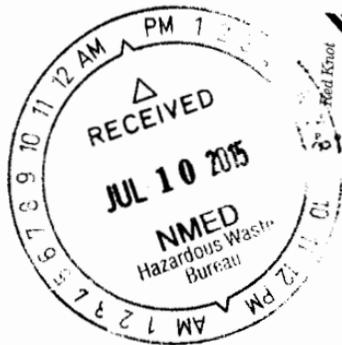

- 1) Corrective Action is not complete, because new data released by SNL reveals that contaminants of concern, including TCE and PCE, have been detected only 50 feet above our aquifer.
- 2) Recent research shows that high level radioactive waste and potentially explosive metallic sodium are in the MWL, making it an illegal dump.

Respectfully,

NMED:

GIVEN ¹⁾ NEW INFORMATION ABOUT EXTREMELY DANGEROUS CONTAMINANTS JUST 50 FEET ABOVE OUR AQUIFER AND ²⁾ LACK OF INFORMATION ABOUT THE EXTENT OF THE PLUME, NMED SHOULD REJECT SANDIA NATIONAL LABS' REQUEST FOR A "CORRECTIVE ACTION COMPLETE" DECLARATION.

OUR AQUIFER IS CRITICAL TO THE SUSTENANCE AND QUALITY OF LIFE IN ALBUQUERQUE, AND TO SUBJECT IT TO THE RISK OF SUCH CONTAMINATION IS COMPLETELY UNACCEPTABLE. EXCAVATION AND SAFE STORAGE IS THE ONLY REASONABLE SOLUTION. Richard Weiner
