Subject: [EXT] Mixed waste landfill

Mr. Cobrain,

It is very clear that the Mixed Waste Landfill poses a real hazard to the health and safety of the people of New Mexico and the environment. I request that you please consider the following: 1. The NM Environment Department (NMED) immediately issue an order for SNL to proceed with Corrective Measures Implementation Plan for the safe and timely excavation of the MWL.

2. NMED hold a public hearing where all voices can be heard on this important community issue.

Thank you
Christina Lucas
