Rio Rancho, New Mexico 87124

RE: RFI Report Submitted Under Civil Action Consent Decree VI-004(h)-87-H

Dear Mr. Mico:

The Environmental Protection Agency (EPA) has completed its review and approves the RCRA Facility Investigation (RFI) report submitted May 21, 1992, with conditional approval of the aquifer parameters and supporting calculations (Appendix 10, Section II, pages 4-10) for the upper flow zone submitted June 15, 1992. The conditional approval is contingent upon the separate review and final approval by EPA for the upper flow zone parameters and supporting calculations in the Report on the Effectiveness of the Ground Water Recovery Well System.

Please submit the Report on the Effectiveness of the Ground Water Recovery Well System within 30 days from receipt of this letter. The report will need to include the references by Hvorslev (1951) and Scharadt (1971) for the supporting calculations.

In addition, the Draft Corrective Measures Study (CMS) report must be submitted within 120 days from receipt of this letter. The CMS report should also specifically address the high contaminant concentrations present in monitoring well MW-32. If you have any questions regarding the above referenced reports, please contact Vincent Malott of my staff at (214) 655-6480.

Sincerely,
