RE: Pre-Draft Post-Closure Permit for Sparton Technologies
NMD083212332-1

Rich
Dear Mr. Mayer:

Enclosed is a pre-draft copy of the Sparton Technologies Post-Closure Care Permit developed by the Hazardous and Radioactive Materials Bureau (HRMB). The Table of Contents is structured to allow the Hazardous and Solid Waste Amendments of 1984 (HSWA) portion of the permit to be Module IV. Would you develop the HSWA part which incorporates the EPA Order, and the EPA signature page and forward these to me? I am now writing the Public Notice documents which talks about the Order and I will fax you a copy of those documents to review before we publish it in the newspaper. We need to coordinate and issue public notice sometime in September. I will need a week or so lead time to get it signed, mailed, and published in the paper.

Also enclosed is a Permit Modification that the New Mexico Environment Department issued recently for White Sands Missile Range. Susan Collins of this office is the contact if you have any questions on this Modification.

Thanks for your help. Call me if you have any questions or comments on the enclosed. Take care.

Sincerely,

Marc
