Sparton Technology, Inc.

Gentlemen:

This is the monthly progress report for Sparton Technology, Inc.'s Coors Road Facility, located in Albuquerque, New Mexico, as required in Section IV.C of the Consent Order. This report summarizes activities performed at the site during the month of April 1993.

Site Activities

Air stripper removal efficiencies continue to average about 99 percent for the measured indicator parameters. During the month, 25,800 gallons of recovered groundwater were treated, bringing the total volume treated to date to 2,522,900 gallons. Air stripper performance data is included in Attachment 1.

Re: Termination of bi-weekly water level readings at the Coors Road Facility

Dear Mr. Mico:

This letter is in confirmation of my instructions to Mr. John Wakefield to terminate bi-weekly water level readings in monitor wells installed at the Coors Road Facility. Conversation with Mr. Vincent Malott of U.S.EPA Region VI and a review of the Consent Order are the basis for this termination.

The Consent Order required the bi-weekly readings as part of detailing the effectiveness of the Interim Measures (Order, IV.A.1.a.i) and also required evaluation of seasonal changes as part of the RCRA Facility Investigation (Order, Exhibit I, Task III, B.1.a.iv). Since the RFI Report has been approved and the report on effectiveness on the Interim Measures has been submitted, the requirements of the Order have been satisfied with respect to the need for bi-weekly readings.

I trust this information is sufficient for your records. If you have any questions, please call.

Very truly yours,

HDR ENGINEERING, INC.

Gentlemen:

We inadvertently sent the March 1993 Monthly Report instead of the April 1993 Report. Enclosed, please find the April 1993 Monthly Report with our apologies.

If you have any questions or need additional information, please do not hesitate to contact us.

Sincerely,

METRIC CORPORATION
