Attention: Mr. Keith Phillips, Chief

Reference: Monthly Report
Sparton Technology, Inc.

Gentlemen:

This is the monthly progress report for Sparton Technology, Inc.'s Coors Road Facility, located in Albuquerque, New Mexico, as required in Section IV.C of the Consent Order. This report summarizes activities performed at the site during the month of July 1993.

Site Activities

Air stripper removal efficiencies continue to average about 99 percent for the measured indicator parameters. Due to inconsistent results from the effluent sampling reported for 1,1,1-Trichloroethane and Trichloroethylene, split samples will be taken at the next sampling and two laboratories used to determine the analysis results.

During the month, 30,900 gallons of recovered groundwater were treated, bringing the total volume treated to date to 2,581,500 gallons. Air stripper performance data is included in Attachment 1.
