FROM: Ronald Kern, HRMB, NMED *RK*

DATE: September 6, 1995

SUBJECT: **Meeting with Sparton Technology, Inc. (Albuquerque) to  
Discuss Site Remedial Alternatives**

Vincent Malott (EPA Region VI) informed me today that a meeting with Sparton Technology is being scheduled tentatively for September 14, 1995 in Dallas, TX at EPA offices.

At this time, EPA is indicating that the remedy at the site is not negotiable. EPA has informed Sparton that Sparton should be prepared to address the remedy proposed by EPA in the draft Statement of Basis. Vince has also stated that EPA legal would be represented at the meeting.

I suggested to Vince that the meeting might be more appropriate in New Mexico since the majority of the "players" are located here. Nevertheless, the meeting will probably still be held in Dallas.

I will try to keep everybody informed of any updates regarding the proposed meeting, including an agenda if one becomes available.
