RE: Ground Water Sampling at Coors Road Facility

Dear John:

I was unable to reach you by telephone today so I am writing to inform you that the New Mexico Environment Department (NMED) would like to collect and analyze ground water samples during the next quarterly sampling event in August as follows:

Samples collected from MW-16, MW-32, MW-51, MW-65 and MW-67 to be analyzed for general water chemistry (major anions and cations), nitrate + nitrite and volatile organic chemicals. In addition, NMED would like to test for DO using a field DO meter for several wells on site.

I will return from vacation on August 6. If you have any questions before then, please call Dennis McQuillan at 827-2831.

Sincerely,

Rob Pine  
Hydrologist  
Assessment & Abatement Section

cc: Ana Marie Ortiz, CGC
