Re: Sparton Technology, Inc. Groundwater Remediation

Dear Mr. Utton:

I have reviewed your request for information of January 28, 2000, regarding the installation of a groundwater remediation device and appurtenant structures on Tract B2, Adobe Wells Subdivision, Albuquerque, Bernalillo County, New Mexico, and adjoining unplatted Sparton property, also located within the municipal limits, zoned C-2 and SU-1.

The well and small building, as described and documented in your correspondence, are granted approval as facilities for the environmental cleanup site, for the duration of remediation. A site plan showing all improvements shall be submitted for my review and approval prior to installation. If any of the related improvements are located in the Bernalillo County portion of the property, Bernalillo County Zoning, Building and Planning shall have the authority to review and approve that proposal.

In approving this installation, we continue to serve the public need in promoting the health, safety, and general welfare of the citizens as provided by the Zoning Code.

Please contact this office if you have further questions.

Sincerely,

Robert E. Romero  
Zoning Enforcement Manager
