Two Pages including this

I got you telephone message from Friday – Thanks

I had tried to get hold of you Friday morning but your message box was full.

Confirming (if I understood your message correctly):

You are looking to simplify the entire documentation process to:

- You are inclined to use the GWMP reporting process for the paperwork trail (Yourself, McQuillan, Swanson, and James Bearzi.)
- Emails will be sent to the paragraph 102 group advising them what has been sent out.
- You have and continue to review with NMED and intend to get back with me today on this.

Jan Appel wanted to help resolve this with us – he is in Vail on vacation but indicated he'd make himself available to talk with us. Once you contact me with your discussion results we can go from there.

One other item – The 400cfm blower is ready to reactivate but since Baird Swanson will be gone until next week, we plan to get the system going as soon as he is available again.
