**Attachments:** MW-80 Lot 8-6-09.jpg

Tony,

NMED and EPA have received a proposal from Sparton (Metric and Stavros Papodopoulos) for the location to install the agreed-upon down-gradient monitoring well, MW-80. After discussion with Gary Richardson, Brian Salem, and Chuck Hendrickson, we approve of the Sparton-proposed lot location for the installation of the down-gradient sentinel ground water monitoring well.

You will obviously need to initiate an application with the City of Albuquerque for access for a drilling permit.

Please don't hesitate to call us if you need to discuss further.

Thanks,

John Kieling

Baird,

Attached is a map showing the available lot for MW-80 in relation to the TCE plume and the water table. Perhaps it will be helpful in your deliberations.

Gary
