**Subject:** Inspection Forms etc.

Good Morning Dr. Spiliotopoulos:

Following the first Peer review of, and Comments on, the draft Spartan Tech. Inc. Post-Closure Care Permit, the following supplemental information to Attachment 4 of the July 13, 2016 Inspection Form is requested for incorporation into the draft Permit:

- 1) Inspection Forms for the Pump & Treat Systems, Extraction Wells, and all Monitoring wells. Include the frequency of inspection of those items and any protective equipment (e.g. goggles, steel-top boots) that Spartan personnel will wear during inspection of those items;
- 2) Recent photographs of the Air Strippers and a detailed description of the Air strippers. I could not find a description that I could glean in the 2016 Annual Report. This item (number 2)/description is needed, but the photos are not required if they are not available. Please send me all the requested information by the end of this month. Thank You.
