Dear Ms. Boultinghouse:

The New Mexico Environment Department (NMED) has reviewed the *Response to Comments regarding Response to Approval with Modifications with Comments 2018 Annual Report* (Response), dated September 13, 2019 submitted by Transwestern Pipeline Company, LLC (the Respondent). The Respondent addressed all of the comments in NMED's June 27, 2019 letter.

Chlorinated solvents have been detected in some groundwater samples collected at the Facility. The New Mexico Water Quality Commission adopted revised regulations that listed 1,4-dioxane as a toxic pollutant on December 21, 2018. The Permittee must analyze groundwater samples collected from all monitoring wells (MW-20, MW-22, MW-26, MW-39, MW-40, MW-41, and MW-42) where chlorinated solvents have been detected within the past ten years for 1,4-dioxane using EPA Method 8270 Selective Ion Monitoring (SIM). Propose to analyze for 1,4-dioxane for two consecutive events in the upcoming revision of the sampling and analysis plan.

Ms. Boultinghouse
