**RE: RESPONSE TO APPROVAL WITH MODIFICATIONS OPERATIONS, MAINTENANCE, AND MONITORING (OM&M) PLAN ROSWELL COMPRESSOR STATION NO.9  
TRANSWESTERN PIPELINE COMPANY  
ROSWELL, CHAVES COUNTY, NEW MEXICO  
EPA ID NMD986676955  
HWB-TWP-21-001**

Dear Ms. Boultinghouse:

The New Mexico Environment Department (NMED) has reviewed the *Response to Approval with Modifications Operation, Maintenance, and Monitoring (OM&M) Plan Roswell Compressor Station No. 9* (Response), dated October 20, 2021, submitted by Transwestern Pipeline Company, LLC (Respondent). NMED hereby issues the following requirement.

**Comment**

The response to NMED's *Approval with Modifications Comment 3* states, "Transwestern is proposing to analyze for the full suite of [volatile organic compounds] VOC by EPA Method 8260 during even years (i.e. 2022, 2024, 2026, etc.) during the 2<sup>nd</sup> semi-annual event to validate the continued dissolved phase plume stability." The proposed analysis plan is hereby approved for the wells where benzene, toluene, ethylbenzene, and xylenes (BTEX) are only listed as analytes in Table 4.2-1. If analytes other than BTEX are detected during the full VOC analytical events (i.e., even years of the 2<sup>nd</sup> semi-annual sampling event), the Respondent must propose to retain and analyze all detected analytes in addition to BTEX for relevant wells in the subsequent OM&M Plan update. No response is necessary.
