**RE: Response to Comment 4
Chloride and Sulfate Communication Summary**
Roswell Compressor Station No. 9
Transwestern Pipeline Company
Roswell, Chaves County, New Mexico
NMOCD Abatement Plan #AP-125 (formerly #GW-052)
EPA ID No. NMD986676955
HWB-TWP-21-001

Dear Mr. Shean;

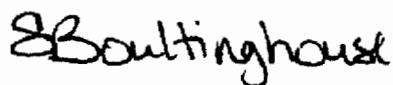

Transwestern Pipeline, LLC (Transwestern) submits this *Response to Comment 4* regarding the comment received from the New Mexico Environment Department (NMED) via the letter titled *[Response To] Approval with Modifications Report of 2020 Groundwater Remediation Activities Transwestern Compressor Station No. 9*, dated January 12, 2022, for the above referenced Site.

Based on the January 12, 2022, correspondence, NMED requested Transwestern to contact the New Mexico Oil Conservation Division (NMOCD) to discuss the chloride and sulfate concentrations in the post treatment water samples that have been above the New Mexico Water Quality Control Commission (NMWQCC) standards of 250 and 600 mg/L, respectively since 2009.

On March 31, 2022, Transwestern discussed via Microsoft® Teams with Mr. Bradford Billings of NMOCD about the chloride and sulfate concentrations in the post treatment water samples and reviewed historical chloride and sulfate concentrations in soil and groundwater for the site prior to installation of the groundwater treatment system. Based on the discussion, NMOCD has no concerns with the chloride and sulfate concentrations in the post treatment water samples.

If you have any further questions or comments regarding these responses, please do not hesitate to contact me at (210) 870-2725 or Steve Diamond of WSP USA, Inc. at (770) 973-2100.

Sincerely,

Ms. Stacy Boultinghouse, PG
Environmental Manager
