TO: FILE  
FROM: PERMITTING AND TECHNICAL SECTIONS  
DATE: FEBRUARY 22, 1994  
SUBJECT: MEETING ON GANDY PROJECT

ATTENDANCE LIST: K. Schultz of The Advantage Consulting Co., D. Gandy of Gandy Corp., S. Alexander, R. Kern, and B. Hoditschek of NMED, and K. Graham, J. Bonner and T. Greenwood of S.M. Stoller Corp.

Discussion opened with comments on the technical review of S. M. Stoller Corp. submitted "Preliminary Geological Investigation Report" and their February 11, 1994 response to HRMB's questions regarding the report.

Summary of the Meeting:

S. M. Stoller Corp's. responses to NMED's technical questions developed after review of the preliminary geologic investigation were considered sufficient, and it was determined that no "red flags" were seen in the preliminary report and that with reasonable confidence Mr. Gandy and associates could proceed in developing a RCRA permit application for a disposal site to submit to NMED. It was however, agreed upon by everyone present, and made clear that additional hydrologic information may be necessary after the technical review of the Part B application was received.

NMED requested from Mr. Gandy a letter of commitment to the project and a timeline for deliverables. Mr. Gandy will submit this information in two weeks. NMED committed to sending Kevin Graham of the S. M. Stoller Corp. a copy of their checklist for review of a RCRA permit application.

Stoller representatives stated that they anticipated sending an application for a RCRA permit (Part A & B) for a hazardous waste disposal unit to NMED in September of 1994. It was made clear to Mr. Gandy and the Stoller representatives that HRMB would address the permit as staffing and scheduling allowed and that the process could take up to a year depending on completeness of the application and responses to deficiencies.
