Mr. Cornelius Amindyas  
New Mexico Environment Department  
Hazardous & Radioactive Materials Bureau  
525 Camino de los Marquez  
P.O. Box 26110  
Santa Fe, New Mexico 87502

Dear Mr. Amindyas:

Enclosed is a revised page (4 of 7) of the Part A Permit Application for the Gandy Marley Inc. landfill. We are sending this revised page in response to your verbal comments on the application.

We have revised Section XII (Process-Codes and Design Capacities) so that the units of measure assigned to the D80 and T02 process codes are consistent with the instructions. We have not revised the units of measure required in Section XIV (Description of Hazardous Wastes) to be consistent with Section XII units of measure because the instructions for Section XIV require that only units of measure such as pounds, tons, kilograms, or metric tons be used.

Thank you very much for your consideration. If you require additional information regarding this submittal or other aspects of the permit application, do not hesitate to call. We look forward to working with you in the future.

Sincerely,

Hart M. "Trey" Greenwood  
Manager, Carlsbad Office
