

9JUN95

I called Kevin Graham, Stoller/Roswell, 623-9076, re. Environmental Assessment (Trey Greenwood advised me yesterday that Kevin was involved in this and had contacted the appropriate agencies).

Kevin advised me an official E.A. hadn't been done but that he'd contacted the appropriate agencies for info on potential problems. Kevin talked with BLM and with NM Game and Fish (in Roswell) to identify listed, threatened, or endangered species, on both Federal and State lists, in the facility area - none were identified. Kevin also contacted NM Energy, Minerals, and Natural Resources to identify endangered plants - again none were identified. Kevin couldn't recall names of contacts but did receive letters (now filed in Carlsbad) regarding the above from the various agencies and will give me names if I need them.

~~CONFIDENTIAL~~
