Re: Triassic Park Hazardous Waste Disposal Facility

I received your certified packet responding to my May 23rd fax on June 17. Your enclosed letter was dated June 11, but on June 12 you were here in Carlsbad, and I attended the "town meeting". I wrote a question to you "what is the status of TPHWDF, and will there be a public hearing?" You answered that there had already been one and that there would be another, and to watch the media for times and dates.

Since that answer came a day after your letter was dated, I am relying on your answer at the meeting as accurate, and planning to attend the public hearing.

Thank you for sending Attachments 1 and 2, but what I am interested in is the environmental impact study, a complete report on the geology of the site, the fact sheet, and times and dates of future public hearings, so that I may consult an independent qualified geologist to verify your evaluation of the site.

Please understand that I am against granting a permit to Gandy-Marley, Inc, and I am still requesting an adjudicatory public hearing pursuant to 902.A.5 of 20 NMAC 4.1 .

I would be receptive to an informal meeting with Gandy-Marley (along with counsel and consultant), after I have received requested information and had time to digest data.
