SECRETARY

EDGAR T. THORNTON, III
DEPUTY SECRETARY

CORRECTION LETTER

July 14, 1997

Dear Concerned Citizen:

Based on additional information received, the New Mexico Environment Department (NMED) is rescinding the Draft Permit, originally issued on April 8, 1996, for the Gandy Marley Incorporated Triassic Park Hazardous Waste Disposal Facility located east of Roswell, New Mexico effective July 14, 1997. Rescinding said Draft Permit does not imply that it has been denied or issued. Further work by NMED is continuing on the project to issue a Permit that complies with all appropriate Regulations and is protective of Human Health and the Environment. You will be notified when the revised Draft Permit is issued and once again asked for your valued comments.

Until the next public notice period, any questions regarding this action can be addressed to either myself or Jerry Bober at (505) 827-1561 or at the Santa Fe address given above.

Sincerely,

Robert S. Dinwiddie
