Mr. Gary Bober
State of New Mexico
Environment Department
P.O. Box 26110
Santa Fe, NM 87502

Dear Mr. Bober:

On September Fourth, I met with Mr. Benito Garcia and certain members of his staff at his office in Santa Fe. The purpose of which was to ascertain information relative to any individual, or entity, seeking a license to allow the establishment of a hazardous and low level radioactive waste storage and disposal facility in New Mexico. Mr. Garcia and staff members were most cordial and courteous. They treated me quite graciously, and I do appreciate it.

Mr. Garcia asked me to make the following request of you in letter form. I am aware of the pending application by Gandy Marley, Inc. for the planned "Triassic Park" facility to be located between Roswell and Tatum, and I am interested in receiving, or reviewing at your office, all file material related to the project which is public information. More importantly, however, I am interested in obtaining and/or reviewing all public information material on other entities which possibly may be planning to establish a similar facility anywhere in New Mexico.

Additionally, it would be greatly appreciated if I could be notified in the future should it come to your attention that plans or efforts for such other projects have been initiated.

Please do not hesitate to contact me if you have any questions or need any further information concerning this request.

I look forward to your response as to when the requested file material can be made available to me.

Very truly yours,

Earle G. Breeding
