Re: Transmittal of *Part A and Part B Permit Application for Triassic Park Hazardous Waste Facility* dated December 1997

Dear Dale:

On behalf of TerraMatrix/Montgomery Watson, S. M. Stoller and DelHart LLC, we are pleased to present three (3) hard copies and one (1) electronic copy of the above referenced document. This document supersedes all previous Part A and Part B permit submittals for the Triassic Park facility. In addition, this document addresses comments provided by ATK and NMED on the previous application submittals.

In accordance with State of New Mexico requirements, the engineering report, design drawings, specifications, construction quality assurance plan, and design calculations have been prepared by professional engineers registered in the State of New Mexico (Patrick Corser - No. 12236 and John Pellicer - No. 13547) with assistance from other engineering and technical staff.

We have enjoyed working with you and Larry Gandy on this project and look forward to the successful development of the Triassic Park Facility. If you have any questions please contact us.

Sincerely,

TerraMatrix/Montgomery Watson
