Steve,

Attached is our latest revision of the TP Permit Application Section 3.0 text (GW Protection). We have updated it based on Glen Von Gonten's comments and recent conference call discussions with him and yourself. The edits are in redline/strikeout. A couple notes as you review:

- We did not address the conceptual site model in this section since it has been incorporated into the VZMS WP instead.

- We checked the figure references and found a few corrections to the text. I have attached an updated list of figures for this section to use for your review. Toby's last revision (in June) included the insertion of 2 figures into the list (3-14 Structure Contour - Top of Lower Dockum, and 3-18 Water Wells - 10 Mile Radius). Therefore, all the figures after #3-14 have been renumbered. We have not reproduced a new full set of figures yet, but can do so upon request. Since only the figure #s will be changing, we would like to wait until this section is final and all comments are resolved.

Please call if you have any questions.

Diane
