Subject: Perimeter Dikes Surrounding Evaporation Pond

Dear Steve,

Some of the drawings from the Engineering Report show that dikes surround the evaporation pond (surface impoundment). The permit application (and the draft permit) do not mention these perimeter dikes. Can you call me sometime this week to discuss how much info we need on these dikes and confirm that their construction and maintenance should be addressed in the permit conditions? If you would prefer, I can call you, just send me an e-mail that specifies a good time for you.

Best Regards,
Mike Smith
