Steve ..

I'd like to review the material in Santa Fe, but am finding it hard to squeeze this into my schedule on short notice. I also appreciate that you are too busy to provide a huge package of data and frankly I don't have time to review it all, but I can focus on one "suspicious" area by looking at 5 boreholes. Would it be possible to copy/send logs for boreholes PB-7, PB-13, PB-14, PB-14C and PB-15C from the southwest corner of the site?? If not, I'll try to find a couple hours to run up in the next couple of weeks. Thanks for your help and interest,

Peggy Johnson
