NOTICE

GANDY MARLEY INC.

(GMI)

"A NEW MEXICO ENTERPRISE, MEETING NEW MEXICO NEEDS"

PUBLIC INFORMATION MEETING

REGARDING TRIASSIC PARK RCRA PERMIT

(A proposed hazardous waste treatment storage and disposal facility)

Day & Date: Friday, May 4, 2001 Time: 6:30 PM to 8:30 PM

Place: Roswell Chamber of Commerce - 131 W. Second

Gandy Marley Inc. (GMI) of Alamogordo, NM is proposing to construct a hazardous waste management facility approximately 43 miles east of Roswell off Highway 380 in Chaves County. The New Mexico Environment Department (NMED) has drafted and opening permit for the facility for which it is currently seeking public comment. Wastes that could be disposed at Triassic Park include spent commercial chemicals such as waste solvents, certain wastewater treatment sludges, gas pipeline residues and petroleum refinery wastes, containing such constituents as lead, mercury, arsenic, benzene, and dichlorodiphenyltrichloroethane (DDT).

GMI invites the public to an informational meeting so that it might become more knowledgeable about the proposed facility and its operating requirements.

MEETING AGENDA

- * GMI OWNERS..AND INVOLVEMENT IN TRIASSIC PARK
- * TYPE OF FACILITY AND LOCATION
- * WASTES ACCEPTED AND MANAGED
- * GEOLOGY - HYDROLOGY - POLLUTION - CONTROL
- * TRANSPORTATION AND ROUTES
- * SAFETY - TECHNICAL - ENGINEERING
- * DRAFT PERMIT AND ADDITIONAL COMMENT PROCEDURE
- * PUBLIC INPUT AND QUESTIONS

Contact Person - Dale Gandy 505-396-4948

*I find this per in the Wednesday 4/25/01
and not Tuesday Paper - 5/1/01*

GANDY MARLEY INC.*"A New Mexico Enterprise, Meeting New Mexico Needs"***5**

April 25, 2001

*Letter being send to
previous meeting attendees
and enclosed with Ken's memo
to Elected officials*

Dear Interested Citizen:

I am writing you on behalf of Gandy Marley Inc. (GMI), regarding the Triassic Park project, of which you attended a "Public Information Meeting" in either Tatum, Lovington, or Roswell on May 4th, 5th, or 10th, 1995 respectively.

We at GMI have been working diligently with the New Mexico Environment Department (NMED) Hazardous Waste Bureau, since that time to make the Triassic Park project become reality.

The draft permit was issued by NMED for public comment on March 15, 2001. We were informed late last week by NMED, that two requests had been received to have another Public Information Meeting, and because of these two requests NMED has asked, and we have agreed to have a meeting in Roswell on Friday May 4th.

Because you had attended a previous meeting, we at GMI thought you might like to also attend this upcoming one to hear how we have made the Triassic Park project even better than it was in 1995.

I have enclosed an information sheet about the meeting, and we hope to see you there.

Sincerely,

Ken Schultz
Community & Government Relations

(Elected Official)

As you are probably aware, I have been working with the Gandy and Marley families from Lovington and Roswell respectively, for a number of years, to help them with the permitting of an economic development project, called Triassic Park, approximately 43 miles east of Roswell, off Highway 380 in Chaves County.

NMED based on two requests they received, have asked us, and we have agreed, to have a Public Information Meeting in Roswell on Friday 5/4/01.

I have enclosed a copy of the letter we are sending out, and a information sheet/newspaper notice that outlines the reason for and project items that will be discussed at the meeting.

We hope to see you there, and if you have any questions, please give me a call.

Sincerely,

*Ken Schultz*1355 WAGON TRAIN SE • ALBUQUERQUE, NEW MEXICO 87123

The Honorable Avon W. Wilson
New Mexico State Representative
1001 Avenida Masana
Roswell, NM 88201

April 15, 2001

Dear Representative Wilson:

This letter is to inform you of the situation regarding the proposed Triassic Park hazardous waste dump slated for east of Roswell. There are a number of problems with the public comment period, scheduled to end May 15, which I felt compelled to bring to Secretary Maggiore's attention with the enclosed letter.

After speaking to a number of residents in the area it is very apparent that many do not have any idea that a hazardous waste dump is being planned for their backyard and many more do not have a clue as to the magnitude, scope, or gravity of the facility. Because informed public comment is an integral part of the permitting process, a fundamental step in the procedure is being crippled by the lack of disseminated information. I urge you to request that the Secretary of the Environment Department extend the deadline for public comment so that a better informed populace may understand the full impact of the proposed facility and respond in kind.

Forgive me, please, for perpetuating rumors, but whispers in the Environment Department indicate that once issued, the applicants will seek to modify the permit so as to accept mixed (hazardous and radioactive) waste and low-level nuclear waste. Interestingly enough, people in New York City and in Washington DC (where people normally think of New Mexico as foreign soil) told me the same rumor and indicated that industry has unofficially designated southeastern New Mexico and west Texas as a "national sacrifice area". These two unrelated easterners even used the same term to describe us: the Toxic Triangle! Is this what we want for our Land of Enchantment?

For your perusal I have enclosed a copy of attachment K of the permit listing all of the compounds the operators of the state's "first" commercial hazardous waste facility wish to bring in. "T" equals tons. I also feel compelled to reveal that the dump will utilize an evaporation pond(s). The release of organic volatiles into the atmosphere is deemed "acceptable" according to the Resource Conservation and Recovery Act because the applicant structured the permit so that initially they will accept less than 10% by volume of these compounds. Unfortunately, the wind does blow here in New Mexico, these permits do get modified, and other people have determined what is "acceptable."

Thank you for your attention to this matter.

Sincerely,

Victor Blair

SIGNS BEING POSTED BY
VICTOR BLAIR per Dale Hendy

CHAVEZ COUNTY WASTE DUMP FOR THE NATION

- 491 DIFFERENT COMPOUNDS
- LEAD, MERCURY, ARSENIC, STRYCHNINE, DDT, TCE...
- OVER 42,000 TONS OF EACH COMPOUND EVERY YEAR
- 5.2 MILLION GALLON EVAPORATION PONDS DESIGNED TO RELEASE CHEMICALS INTO THE AIR
- TCE HAS BEEN FOUND IN RAIN WATER AND LOSES ONLY HALF ITS POTENCY AFTER A WEEK IN THE AIR
- FUTURE PERMIT MODIFICATIONS COULD ALLOW
THE WORLD'S WASTE
MIXED WASTE (HAZARDOUS & RADIOACTIVE)
LOW LEVEL NUCLEAR
