American space tourist board the Soyuz rocket at on Saturday.

the Soyuz spaceship
the space station, and
by three if Endeavour
to extend its stay. Com-
problems aboard the sta-

tion we kept Endeavour
there longer than expected by
preventing astronauts from
wrapping up work with a crit-
ical robot arm.

NASA overcame the com-
puter problems Saturday,
allowing the robot arm opera-
tion to be carried out. Their
work helped clear the way for
the shuttle to undock Sunday,
which would allow the Soyuz
to arrive on Monday as
planned.

Docking the Soyuz while
the U.S. shuttle is still there
would make the operation
more difficult and potentially
dangerous, and U.S. space offi-
cials had urged Russia to post-
pone the flight.

The final hurdles were
resolved only on the eve of the
Soyuz launch. Russia had
promised to put the Soyuz in a
holding position for an extra
day if the shuttle needed to
stay until Monday.

Officials develop security plan for McVeigh protesters

By Rex W. Huppke
Associated Press Writer

TERRE HAUTE, Ind. —
Officials have mapped out how
they will handle demonstrators
at Timothy McVeigh's execu-
tion, agreeing on tight security
that will severely limit what
protesters can bring on prison
grounds.

Security will be so rigid that
regardless of the weather, no
protesters will be allowed to
carry umbrellas.

McVeigh, 33, is scheduled to
be executed by injection at the
federal penitentiary in Terre
Haute for the 1995 bombing of
the Alfred P. Murrah Federal
Building in Oklahoma City,
which killed 168 people.

Officials decided Friday that
demonstrators can begin gather-
ing at two city parks the
night before the May 16 execu-

tion — one park for death
penalty supporters and a sec-
ond for opponents.

Demonstrators will be
screened by Bureau of Prison
officials, searched with portable
metal detectors, then allowed
to board buses with barred
windows.

They will be limited in what
they can bring on prison
grounds: a poster that can roll
up, a candle with a wind
shield, keys, cell phones and
pagers, religious medallions
and a hymn book, Bible or
other book. Only those with
medical conditions that require
food and drink can bring them
along. About 20 buses will be
available to shuttle protesters
from the parks to the prison,
where they may be searched
again before being routed to
two areas that are 500 yards
apart.

and, second-guessing
and one question con-
to echo in the hallways.

Will grounded flights mean trafficking rise?

WASHINGTON — It was
final, but effective. Peru's
court ordered drug planes
out of the sky to stop
trafficking of semiprocessed
cocaine from this country to
Columbia in the early 1990s.
As a result, Peru's production
of cocaine, the raw material for
heroin, has dropped steadily.
Following the fatal attack
of 20 on an American mis-
sionary plane in Peru, the poli-
ce is on hold. Some worry the
grounded flights will resume; drug
policy analysts are not so sure.
Drug production has changed
since the early 1990s, when
Peru was the world's leading

NOTICE

Gandy Marley, Inc. (GMI)

"A New Mexico Enterprise, Meeting New Mexico's Needs"

PUBLIC INFORMATION MEETING

Regarding Triassic Park RCRA Permit

(A proposed hazardous waste treatment storage and disposal facility)

Day & Date: Friday May 4, 2001

Time: 6:30 p.m. to 8:30 p.m.

Place: Roswell Chamber of Commerce, 131 W. 2nd St.

Gandy Marley Inc. (GMI) of Tatum, NM is proposing to construct a hazardous waste management facility approxi-
mately 43 miles east of Roswell off Highway 380 in Chaves County. The New Mexico Environment Department
(NMED) has drafted an operating permit for the facility for which it is currently seeking public comment. Wastes
that could be disposed at Triassic Park include spent commercial chemicals such as waste solvents, certain
wastewater treatment sludges, gas pipeline residues, and petroleum refinery wastes, containing such constituents
as lead, mercury, arsenic, benzenes and dichlorodiphenyltrichloroethane (DDT)

GMI invites the public to an information meeting so that it might become more knowledgeable about the proposed
facility and its operating requirements.

MEETING AGENDA:

- GMI owners and involvement in Triassic Park
- Type of facility and location
- Wastes accepted and managed
- Geology - Hydrology - Pollution Control
- Transportation and Routes
- Safety - Technical - Engineering
- Draft Permit and Additional Comment Procedure
- Public Input and Questions

Contact Person: Dale Gandy (505) 396-4948
