JUL 2001
RECEIVED

Attn: Mike Marley

My name is Lana Thompson. I attended the public meeting held at the Sally Port in Roswell, New Mexico on July 17, 2001 held by Gandy/Marley. During the question and answer period of the meeting the last question asked before the meeting adjourned was as follows:

Lana Thompson: I have a big problem with the evaporative pits. I have had cancer and am concerned about the carcinogens.

Gandy/Marley Representative: We are going to follow the EPA regulations, which they feel are safe for humans.

Lana Thompson: Then there are no carcinogens?

Gandy/Marley Representative: No carcinogens

Lana Thompson: So I can feel safe that there are no carcinogens, correct?

Gandy/Marley Representatives: That is correct, there will be no carcinogens.

Meeting was adjourned because it had progressed beyond the 9 p.m. schedule. Last comment was by Dr. Clark, who asked if the presenters "wouldn't mind their families living at the site then"... (based upon the answer given to Lana Thompson). No reply was given.

The above is the recollection of Lana Thompson and to the best of her knowledge is true and accurate.

Lana Thompson
