Could you please assist me with a review of the attached AK procedure.

The Secretary has directed that the TP Permit require additional waste characterization documentation for wastes coming from foreign generators. The attached procedure is our approach to satisfy his edict. You'll note it looks very similar to the WIPP AK requirements but is geared toward commercial facilities. Though we intend to only add these requirements for foreign wastes at this time, we'll require it for all wastes first time we modify the Permit.

Perhaps Connie could assist. I have to finalize the Attachment so that the Permit can be done April 17. If you or Connie can't assist for any reason, please let me know ASAP.

Thanks, SP
