RON CURRY
SECRETARY

FAX COVER SHEET

DATE: July 1, 2005
TO: Larry Gandy
COMPANY: Gandy Marley, Inc.
FAX NO.: 505 398-6887
MESSAGE: Mr. Larry Gandy:

Attached are NMED's analytical results for the sampling performed on June 7, 2005 of the milky white liquid stored in the 55-gallon drum at Cell 6 of the UST landfarm. As you can see, both the inorganic and organic analytical results show that the material is not a hazardous waste. This does not mean however that the waste is allowable under GMI's GWQB discharge permit.

If the analytical results of your split sample are significantly different than NMED's please provide a copy of those results.

NMED's analytical results include considerable quality assurance documentation. If GMI is interested in a copy of that documentation please call me at the telephone number below.

Thank you again for your cooperation during the recent inspection. Please call me with any questions.
