OCT 26 2007

RE: United States Environmental Protection Agency (EPA) Region 6 Review of the Triassic Park Resource Conservation and Recovery Act (RCRA) Part B Permit Application and Permit, EPA ID NM0001002484.

Dear Mr. Bearzi:

In coordination with your agency, we have completed our hazardous waste application/permit reviews for the facility referenced above. The purpose of this letter is to document our review process while providing oversight for hazardous waste permitting.

Our review was initiated during April 2007, which started with document compilation (access to permit application and revisions based upon your notice of deficiency letters). Since this facility has not yet been constructed, no site visit was conducted. We completed a RCRA permit review checklist (with respect to federal regulations) which took into account the revisions that had been made to the application that were submitted in 1994, 1996, 1998, and 2000. The permit application was found to be administratively and technically complete. We have also reviewed the permit language of the final permit issued to this facility, and find that it is in compliance with standards for RCRA permitted landfills.

If you have any questions regarding this letter, please contact me or have your staff contact Mr. James Sales of my staff at (214) 665-6796.

Sincerely yours,

Kishor Fruitwala, Ph. D., P.E.
Chief, Facility Assessment Section (6PD-A)
Multimedia Planning and
Permitting Division
