Don -

Regarding your February 28 fax requesting to be kept informed on any new information appearing in the WWIS, attached are two reports I generated this afternoon. The Repository Report indicates that RFETS has twenty-six 55 gallon drums with a status code of "Pending Characterization." The Waste Container Data Report provides the details available for container number RFD19003. Also attached is a list of container numbers which I transcribed manually from the WWIS identifying all twenty-six drums from RFETS which are pending characterization. Because these containers are neither characterized nor certified, there is no shipment information for them in the WWIS.
