COMMENTS

Don -

Attached is a preliminary Waste Stream Profile Form (**WSPF**) from CAO for RFETS waste stream RF002.01, including the cover memo from Butch Stroud. We had two comments on the preliminary WSPF: (1) on Table 2, clarify that the number of samples are really number of detects, and that statistics for calculating various values uses all samples with non-detects figured in, and (2) on Table 7, clarify that this is the entire list of containers used to complete the WSPF and to calculate statistics for Table 2. By your request of March 1, I will also send you the approved WSPF when it becomes available.
