**COMMENTS**

Don -

Attached are the shipment reports for RF0000006 and 07, and the current repository report indicating only one drum certified for any subsequent shipment. There is no other information regarding upcoming shipments from RFETS or any other site. Also, there are no other waste stream profile forms (**WSPFs**) which have been submitted or which are anticipated. I have noted your continuing requests for WSPFs. However, I ask your forgiveness in advance if I mistakenly overlook this matter and happen to forget one in the future. Just ask me again if you believe NMED has received any new WSPFs.

Also attached is the DOE's Notification of Class 1 Permit Modification you requested on the phone. The redline on the final page probably will not be noticeable in the fax. Finally, when I receive the Hanford Final Audit Report (expecting it either today or tomorrow), I will fax you the transmittal letter and inform you of what is available for your review.
