Steve Zappe, N M E D
2044 A Galister St,
Santa Fe, N.M. 87505

Dear Mr. Zappe,

In regard to the public safety of the W I P P installation and the shipments of new waste products from around the country into New Mexico, I am requesting well advertised, accessible public hearings, soon.

It seems common sense that a part of our state that must be monitored for up to 10,000 years be well-known to the public. Details should be well-understood. People should be aware and educated about this responsibility. Secrecy is how we got into this mess.

Rosamund Evans

Sincerely,
Rosamund Evans
