Dear Information User:

The Transportation Resource Exchange Center (T-REX) ([www.trex-center.org](http://www.trex-center.org)) is a Virtual Library established as a cooperative effort between the ATR Institute (ATRI) at the University of New Mexico and the U.S. Department of Energy, National Transportation Program (DOE NTP). The Center provides information on the transportation of radioactive materials and wastes. If you need specific searches or data in this area, T-REX technical researchers can assist you.

New at T-REX is The TRAM, a searchable database of stakeholders involved in the process of shipping radioactive materials ([www.trex-center.org/thetram.asp](http://www.trex-center.org/thetram.asp)). The TRAM is the only on-line, searchable directory that provides the data sets of General Area of Operation, Specific Expertise, Geographic Scope of Work and Internal/External DOE status for groups that are involved in radioactive material transport.

Your feedback on how well T-REX and The TRAM meet your needs is important. Please visit the T-REX Web site and send us your comments. For technical assistance, contact us toll-free: 1-877-287-TREX, fax: 1-505-246-6001 or e-mail: [trex@unm.edu](mailto:trex@unm.edu).

Thank you in advance for your cooperation. Together, we can build the world's premier Web site on comprehensive information related to the transport of radioactive materials.

Sincerely,

Judith M. Espinosa  
Director, ATR Institute
