Hi, Lisa -

Thank you for your comment. For our records, could you please provide me with your full address and affiliation, if appropriate? Although not required by the regulations, we will need it when we respond to all written comments because we mail our responses and do not use e-mail for that purposes. We will also add your name to our WIPP facility mailing list. Thanks!

Steve Zappe
NMED WIPP Project Leader

I think it is an excellent idea to use digital radiography and computed tomography to confirm radiography results. Not only does this minimize the number of drums that will need to be opened it also minimizes the amount of waste generated during the characterization process. Congratulations to the team who came up with this idea!
