Don -

Attached is the approved Waste Stream Profile Form received this morning for RF006.01 (Mg Oxide Crucibles/TRU). There were several additional attachments totaling about another 100 pages. One discussed the non-hazardous determination based upon sampling for TCLP metals cadmium, chromium, and lead, while the other was the detailed results of headspace gas sampling. If you want those additional pages, I suggest you copy them on a subsequent visit to Santa Fe.
