Comments on Proposed Class 2 Modification
(Class 2 Package Modification Request)
To the Hazardous Waste Facility Permit
For the U.S. Department of Energy's Waste Isolation Pilot Plant

For the proposed CLASS 2
Modifications to W.I.P.P., in
which the public comment period
ends on July 6, 2001, Friday,
the drum age criteria seems
quite complex, so therefore,
I suggest that the State of
New Mexico Environment Dept.
deny this drum age criteria
~~request~~ request and
suggest to the W.I.P.P. people
in writing that the
drum age criteria request go
to a proposed CLASS 3 modification
request, to be on the safe side.
As far as the proposed CLASS 2
increase in temporary surface
storage space, which has
got 10 drum overpacks

To the Hazardous Waste Facility Permit
For the U.S. Department of Energy's Waste Isolation Pilot Plant

Public comment section ends on July 6, 2001, Friday, a quite important ripple effect should be considered also, which is an increase in parking area, which I believe is a Class 3 proposed modification to W.I.P.P. As a result, the state of New Mexico Environment Dept. should deny increase in the temporary surface storage areas for the 10-drum overpacks, and suggest in writing to ^{people} W.I.P.P. that this ~~proposed~~ increase to ^{temporary} surface storage space of 10 drum overpacks as well as the potential increase in parking area be made into a proposed class 3 modification request.

all at the same time. Also, the descriptions of containers into one attachment to the Hazardous Waste Facility Permit, ~~which~~^{no} which is a proposed Class 2 modification request in which the public comment section ends on July 6, 2001, Friday, it sounds good in theory, but I do not know if it would be good in practice, so perhaps this ~~should~~^{error} should be made into a proposed class 3 ~~modification request~~^{no} modification request to be on the safe side, by the W.I.P.P. people.
